- Optimized inner windscreen ensures ultra-low p-pops
- Extremely rugged microphone for multivocalists
- Patented AKG Laminated Varimotion diaphragm
- Spring steel wire-mesh grill
- Optimized inner windscreen
- Precision metal dust filter guards the diaphragm

# BBB DFive

The BBB DFive dynamic vocal microphone for solo performance and lead vocals. It delivers the sound spectrum for all multivocalists world wide. Technically based on the D 5 its supercardioid polar pattern ensures maximum gain before feedback. The BBB DFive acoustics have been improved with a more robust inner windscreen preventing pop noises without losing that brilliant high sound.

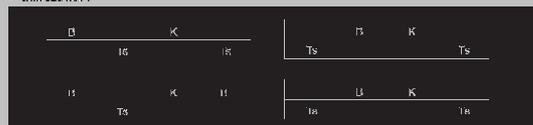

The patented Laminated Varimotion diaphragm deep-drawing process allows the diaphragm itself to be fine-tuned with no extra tuning resonators, leading to a quantum leap in audio performance. The dual shock mount eliminates any kind of mechanical noise for trouble-free live use. The audience will hear nothing but the pristine sound of your voice!

The user manual features the basic techniques of Beatboxing and this microphone will be the official Beatbox Battle © tool for the next years.
