### description

The CD74FCT841A is a 10-bit, D-type latch with 3-state outputs, designed specifically for driving highly capacitive or relatively low-impedance loads. It is particularly suitable for implementing buffer registers, I/O ports, bidirectional bus drivers, and working registers. The device provides extra data width for wider address/data paths or buses carrying parity. The latches are transparent D-type latches. The device provides noninverted outputs.

The device uses a small-geometry BiCMOS technology. The output stage is a combination of bipolar and CMOS transistors that limits the output high level to two diode drops below  $V_{CC}$ . This resultant lowering of output swing (0 V to 3.7 V) reduces power-bus ringing [a source of electromagnetic interference (EMI)] and minimizes  $V_{CC}$  bounce and ground bounce and their effects during simultaneous output switching. The output configuration also enhances switching speed and is capable of sinking 48 mA.

The CD74FCT841A outputs are transparent to the inputs when the latch enable (LE) is high. When LE goes low, the data is latched. The output-enable ( $\overline{OE}$ ) input controls the 3-state outputs. When  $\overline{OE}$  is high, the outputs are in the high-impedance state. The latch operation is independent of the state of  $\overline{OE}$ .

OE does not affect the internal operations of the latch. Previously stored data can be retained or new data can be entered while the outputs are in the high-impedance state.

The CD74FCT841A is characterized for operation from 0°C to 70°C.

## FUNCTION TABLE (each latch)

	INPUTS							
OE	LE	D	Q					
L	Н	Н	Н					
L	Н	L	L					
L	L	Χ	Q <sub>0</sub> Z					
Н	Χ	Χ	Z					

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

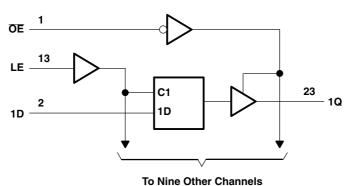

### logic symbol<sup>†</sup>

 $<sup>^\</sup>dagger$  This symbol is in accordance with ANSI/IEEE Std 91-1984 and IEC Publication 617-12.

### logic diagram (positive logic)

### absolute maximum ratings over operating free-air temperature range (unless otherwise noted)<sup>‡</sup>

DC supply voltage range, V <sub>CC</sub>	0.5 V to 6 V
DC input clamp current, $I_{IK}$ ( $V_I < -0.5 \text{ V}$ )	–20 mA
DC output clamp current, $I_{OK}$ ( $V_O < -0.5 \text{ V}$ )	–50 mA
DC output sink current per output pin, I <sub>OL</sub>	70 mA
DC output source current per output pin, I <sub>OH</sub>	
Continuous current through V <sub>CC</sub> , (I <sub>CC</sub> )	260 mA
Continuous current through GND	500 mA
Package thermal impedance, θ <sub>JA</sub> (see Note 1): EN package	67°C/W
M package	46°C/W
Storage temperature range, T <sub>stq</sub>	–65°C to 150°C

<sup>&</sup>lt;sup>‡</sup> Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTE 1: The package thermal impedance is calculated in accordance with JESD 51.

SCBS725 - JULY 2000

### recommended operating conditions (see Note 2)

		MIN	MAX	UNIT
V <sub>CC</sub>	Supply voltage	4.75	5.25	V
V <sub>IH</sub>	High-level input voltage	2		V
$V_{IL}$	Low-level input voltage		8.0	V
VI	Input voltage	0	$V_{CC}$	V
V <sub>O</sub>	Output voltage	0	$V_{CC}$	V
I <sub>OH</sub>	High-level output current		-15	mA
I <sub>OL</sub>	Low-level output current		48	mA
Δt/Δν	Input transition rise or fall rate	0	10	ns/V
T <sub>A</sub>	Operating free-air temperature	0	70	°C

NOTE 2: All unused inputs of the device must be held at V<sub>CC</sub> or GND to ensure proper device operation. Refer to the TI application report, *Implications of Slow or Floating CMOS Inputs*, literature number SCBA004.

# electrical characteristics over recommended operating temperature range (unless otherwise noted)

24244555	TEGT GOVERNING	.,	T <sub>A</sub> = 25°C					
PARAMETER	TEST CONDITIO	v <sub>cc</sub>	MIN	MAX	MIN	MAX	UNIT	
V <sub>IK</sub>	$I_I = -18 \text{ mA}$		4.75 V		-1.2		-1.2	V
V <sub>OH</sub>	I <sub>OH</sub> = -15 mA		4.75 V	2.4		2.4		V
V <sub>OL</sub>	I <sub>OL</sub> = 48 mA		4.75 V		0.55		0.55	V
l <sub>l</sub>	V <sub>I</sub> = V <sub>CC</sub> or GND		5.25 V		±0.1		±1	μΑ
I <sub>OZ</sub>	$V_O = V_{CC}$ or GND		5.25 V		±0.5		±10	μΑ
I <sub>OS</sub> †	$V_I = V_{CC}$ or GND, $V$	' <sub>O</sub> = 0	5.25 V	-75		-75		mA
Icc	$V_I = V_{CC}$ or GND,	O = 0	5.25 V		8		80	μΑ
Δl <sub>CC</sub> ‡	One input at 3.4 V, Other inputs at V <sub>CC</sub> or GND		5.25 V		1.6		1.6	mA
C <sub>i</sub>	V <sub>I</sub> = V <sub>CC</sub> or GND				10		10	pF
Co	V <sub>O</sub> = V <sub>CC</sub> or GND				15		15	pF

<sup>†</sup> Not more than one output should be tested at a time, and the duration of the test should not exceed 100 ms.

# timing requirements over recommended operating temperature conditions (unless otherwise noted) (see Figure 1)

			MIN	MAX	UNIT
t <sub>w</sub>	Pulse duration		4		ns
t <sub>su</sub>	Setup time C	Data before LE↓	2.5		ns
t <sub>h</sub>	Hold time C	Data after LE↓	2.5		ns

# switching characteristics over recommended operating temperature conditions (unless otherwise noted) (see Figure 1)

DADAMETED	FROM	то	T <sub>A</sub> = 25°C		MAX	
PARAMETER	(INPUT)	(OUTPUT)	TYP	MIN		UNIT
	D		6.8	1.5	9	
t <sub>pd</sub>	LE	Q	9	2	12	ns
t <sub>en</sub>	ŌĒ	Q	8.6	1.5	11.5	ns
t <sub>dis</sub>	ŌĒ	Q	6	1.5	8	ns

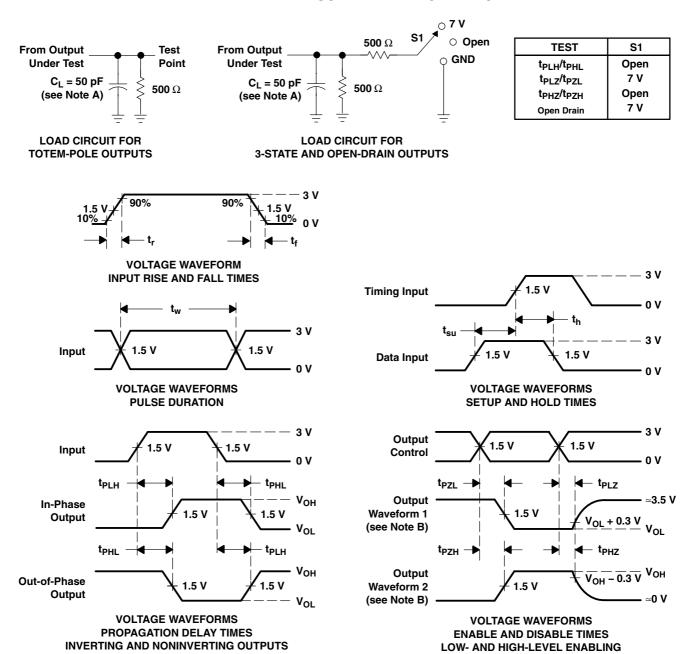

<sup>&</sup>lt;sup>‡</sup> This is the increase in supply current for each input at one of the specified TTL voltage levels rather than 0 V or V<sub>CC</sub>.

## CD74FCT841A **BICMOS 10-BIT BUS-INTERFACE D-TYPE LATCH** WITH 3-STATE OUTPUTS SCBS725 - JULY 2000

## noise characteristics, $V_{CC}$ = 5 V, $C_L$ = 50 pF, $T_A$ = 25°C

	PARAMETER	MIN	TYP	MAX	UNIT
V <sub>OL(P)</sub>	Quiet output, maximum dynamic V <sub>OL</sub>		1		V
V <sub>OH(V)</sub>	Quiet output, minimum dynamic V <sub>OH</sub>		0.5		V
V <sub>IH(D)</sub>	High-level dynamic input voltage	2			V
V <sub>IL(D)</sub>	Low-level dynamic input voltage			8.0	V

### PARAMETER MEASUREMENT INFORMATION

NOTES: A.  $C_L$  includes probe and jig capacitance.

- B. Waveform 1 is for an output with internal conditions such that the output is low except when disabled by the output control. Waveform 2 is for an output with internal conditions such that the output is high except when disabled by the output control.
- C. All input pulses are supplied by generators having the following characteristics: PRR  $\leq$  1 MHz,  $Z_O = 50 \Omega$ ,  $t_r$  and  $t_f = 2.5$  ns.
- D. The outputs are measured one at a time with one input transition per measurement.
- E. t<sub>Pl 7</sub> and t<sub>PH7</sub> are the same as t<sub>dis</sub>.
- F.  $t_{PZL}$  and  $t_{PZH}$  are the same as  $t_{en}$ .
- G. t<sub>PHL</sub> and t<sub>PLH</sub> are the same as t<sub>pd</sub>.

#### **PACKAGING INFORMATION**

Orderable Device	Status (1)	Package Typ	e Package Drawing	Pins	Package Qty	Eco Plan <sup>(2)</sup>	Lead/ Ball Finish	MSL Peak Temp <sup>(3)</sup>	Samples (Requires Login)
CD74FCT841AEN	OBSOLETE	PDIP	NT	24		TBD	Call TI	Call TI	Samples Not Available
CD74FCT841AM	OBSOLETE	SOIC	DW	24		TBD	Call TI	Call TI	Samples Not Available
CD74FCT841AM96	OBSOLETE	SOIC	DW	24		TBD	Call TI	Call TI	Samples Not Available

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

**Pb-Free** (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes. **Pb-Free** (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

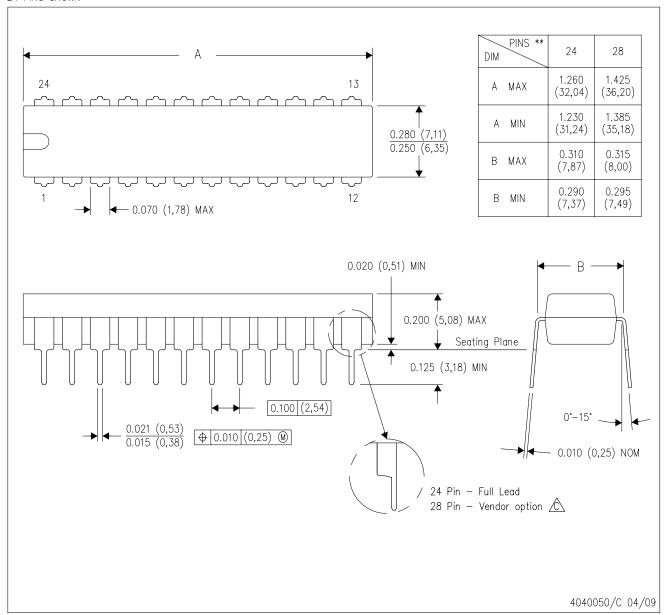

**Important Information and Disclaimer:** The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

### PLASTIC DUAL-IN-LINE PACKAGE

24 PINS SHOWN

NOTES: A. All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M-1994.

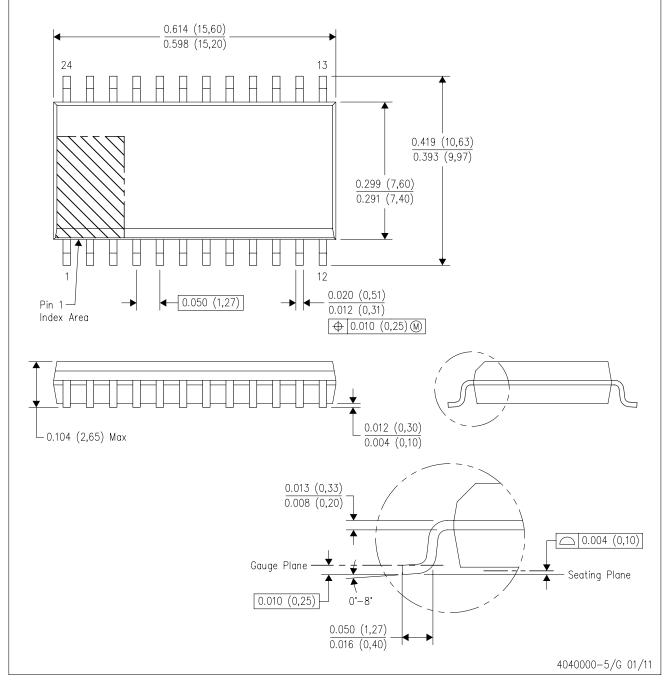

B. This drawing is subject to change without notice.

The 28 pin end lead shoulder width is a vendor option, either half or full width.

DW (R-PDSO-G24)

### PLASTIC SMALL OUTLINE

NOTES: A. All linear dimensions are in inches (millimeters). Dimensioning and tolerancing per ASME Y14.5M-1994.

- B. This drawing is subject to change without notice.
- C. Body dimensions do not include mold flash or protrusion not to exceed 0.006 (0,15).
- D. Falls within JEDEC MS-013 variation AD.

#### IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
