

DS8654

DS8654 8-Output Display Driver (LED, VF, Thermal Printer)

Literature Number: SNOSBM7A

DS8654 8-Output Display Driver (LED, VF, Thermal Printer)

General Description

DS8654 is an 8-digit driver with emitter/follower outputs. It can source up to 50 mA at a low impedance, and operates with a constant internal drive current over a wide range of power supply—from 4.5V to 33V. The DS8654 can be used to drive electrical or mechanical, multiplexed or unmultiplexed display systems. It can be used as a segment driver for common cathode displays with external current limiting resistors or can drive incandescent or fluorescent displays directly, both digits (anodes) and segments (grids). It will be necessary to run the device at a lower duty cycle, to keep the maximum package dc power dissipation less than 600 mW while operating all 8 outputs at high supply voltage

and large source current. The inputs are MOS compatible and eliminate the need for level shifting since inputs are referenced to the most negative supply of system.

System Description

The DS8654 is specifically designed to operate a thermal printing head for calculator or other uses. In this application the same segment in each digit is selected at the same time, reducing the overall time for a complete print cycle. The DS8654 is an 8-digit driver. With a 15-digit print head, two of the DS8654 are required.

Absolute Maximum Ratings (Note 1)

If Military/Aerospace specified devices are required, please contact the National Semiconductor Sales Office/Distributors for availability and specifications.

Supply Voltage	36V
Input Voltage	36V
Output Voltage	$V_{CC} - 36V$
Storage Temperature Range	-65°C to +150°C
Maximum Power Dissipation* at 25°C	
Molded Package	1563 mW
Lead Temperature (Soldering, 4 seconds)	260°C

*Derate molded package 12.5 mW/°C above 25°C.

Operating Conditions

	Min	Max	Units
Supply Voltage (V_{CC})	4.5	33	V
Temperature (T_A)	0	+70	°C

Electrical Characteristics (Notes 2 and 3)

Symbol	Parameter	Conditions	Min	Typ	Max	Units
I_{IH}	Logical "1" Input Current	$V_{CC} = \text{Max}, V_{IN} = 6.5V$		390	500	μA
I_{IL}	Logical "0" Input Current	$V_{CC} = \text{Max}, V_{IN} = 0.4V$		13	40	μA
I_{OFF}	"Off" State Leakage Current	$V_{OUT} = V_{CC} - 33V$		0.01	-100	μA
V_{ON}	"On" State Output Voltage	$V_{CC} = \text{Max}, I_{IN} = 500 \mu A,$ $I_{OH} = -50 \text{ mA}$		$V_{CC} - 1.8$	$V_{CC} - 2.5$	V
$I_{CC(OFF)}$	Supply Current	$V_{CC} = \text{Max}, V_{IN} = V_{OUT} = \text{GND}$		0.01	1.0	mA
$I_{CC(ON)}$	Supply Current (All Outputs "ON")	$V_{CC} = \text{Max}, V_{IN} = 6.5V,$ $I_{OUT} = 0 \text{ mA}$		7.5	10	mA

Note 1: "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed. They are not meant to imply that the devices should be operated at these limits. The table of "Electrical Characteristics" provides conditions for actual device operation.

Note 2: Unless otherwise specified min/max limits apply across the 0°C to +70°C range for the DS8654. All typicals are given for $V_{CC} = 30V$ and $T_A = 25^\circ C$.

Note 3: All currents into device pins shown as positive, out of device pins as negative, all voltages referenced to ground unless otherwise noted. All values shown as max or min on absolute value basis.

LIFE SUPPORT POLICY

NATIONAL'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF NATIONAL SEMICONDUCTOR CORPORATION. As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and whose failure to perform, when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

National does not assume any responsibility for use of any circuitry described, no circuit patent licenses are implied and National reserves the right at any time without notice to change said circuitry and specifications.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
