

## KA3526B

## SMPS CONTROLLER

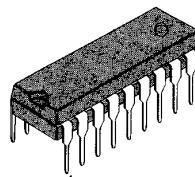

### VOLTAGE - MODE PWM CONTROLLER

The KA3526B is an excellent PWM controller for SMPS and other power control applications.

Functions included in an 18 dual-in-line package are a temperature stable voltage reference, pulse width modulator, error amplifier, sawtooth oscillator and two low impedance power drivers.

Protective features are included such as under voltage lockout, soft start, digital current limiting, adjustable deadtime and double pulse inhibit.

18 DIP

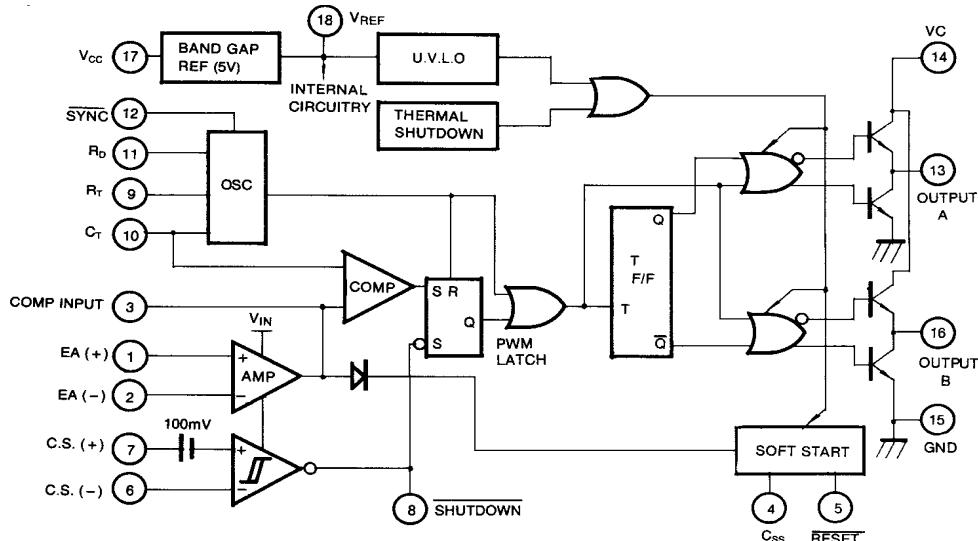

### FEATURES

- 8 to 35V Operation
- 5V Bandgap Reference Trimmed to  $\pm$  1%
- Dual 100mA Source/Sink Outputs
- Programmable Dead Time
- Under-Voltage Lockout
- Single Pulse Metering
- Programmable Soft-Start
- Wide Current Limit Common Mode Range
- TTL/CMOS Compatible Logic Parts
- Symmetry Correction Capability
- Digital Current Limiting

### ORDERING INFORMATION

| Device  | Package | Operating Temperature |
|---------|---------|-----------------------|
| KA3526B | 18 DIP  | 0 ~ +70°C             |

### BLOCK DIAGRAM

**ABSOLUTE MAXIMUM RATINGS**

| Characteristic                             | Symbol            | Value       | Unit |
|--|-------------------|-------------|------|
| Supply voltage                             | V <sub>CC</sub>   | 40          | V    |
| Collector Supply Voltage                   | V <sub>C</sub>    | 40          | V    |
| Output Current, Sink or Source             | I <sub>O</sub>    | 200         | mA   |
| Reference Output Current                   | I <sub>REF</sub>  | 50          | mA   |
| Power Dissipation (T <sub>A</sub> = 25 °C) | P <sub>D</sub>    | 1000        | mW   |
| Operating Temperature                      | T <sub>OPR</sub>  | 0 ~ +70     | °C   |
| Storage Temperature                        | T <sub>STG</sub>  | - 65 ~ +150 | °C   |
| Lead Temperature (Soldering, 10sec)        | T <sub>LEAD</sub> | +300        | °C   |
