### DESCRIPTION

The M54/74HC4024 is a high speed CMOS 7-STAGE BINARY COUNTER fabricated in silicon gate C<sup>2</sup>MOS technology. It has the same high speed performance of LSTTL combined with true CMOS low power consumption. The HC4024 is a 7 stage Counter. This device is incremented on the falling edge (negative transition) of the input clock, and all its outputs are reset to a low level by applying a logical high on their reset input. All inputs are equipped with protection circuits against static discharge and transient excess voltage.
