

## MM54C154/MM74C154 4-Line to 16-Line Decoder/Demultiplexer

### General Description

The MM54C154/MM74C154 one of sixteen decoder is a monolithic complementary MOS (CMOS) integrated circuit constructed with N- and P-channel enhancement transistors. The device is provided with two strobe inputs, both of which must be in the logical "0" state for normal operation. If either strobe input is in the logical "1" state, all 16 outputs will go to the logical "1" state.

To use the product as a demultiplexer, one of the strobe inputs serves as a data input terminal, while the other strobe input must be maintained in the logical "0" state. The information will then be transmitted to the selected output as determined by the 4-line input address.

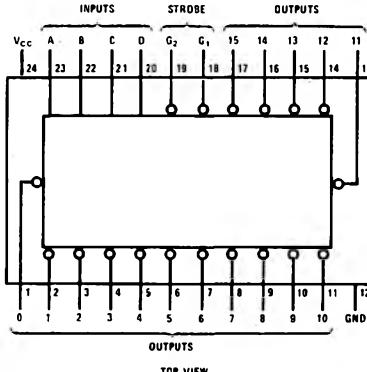

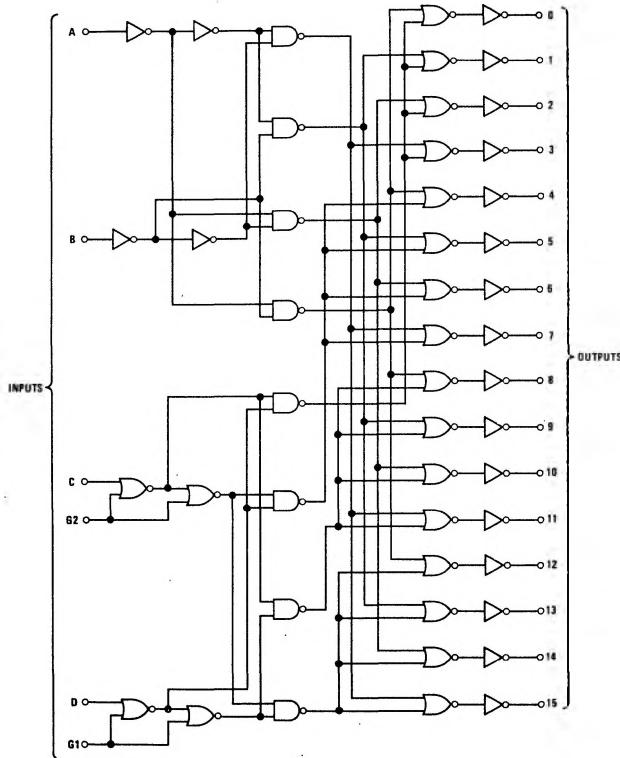

### Features

- Supply voltage range 3 V to 15 V
- Tenth power TTL compatible drive 2 LPTTL loads
- High noise margin 1 V guaranteed
- High noise immunity 0.45  $V_{CC}$  (typ.)

### Applications

- Automotive
- Alarm systems
- Data terminals
- Industrial electronics
- Instrumentation
- Remote metering
- Medical electronics
- Computers

### Logic and Connection Diagrams

**Absolute Maximum Ratings** (Note 1)

Voltage at Any Pin	-0.3 V to $V_{CC} + 0.3$ V
Operating Temperature Range MM54C154	-55°C to +125°C
MM74C154	-40°C to +85°C
Storage Temperature Range	-65°C to +150°C
Maximum $V_{CC}$ Voltage	18 V
Package Dissipation	500 mW
Operating $V_{CC}$ Range	3 V to 15 V
Lead Temperature (Soldering, 10 sec.)	300°C

**DC Electrical Characteristics** Max./min. limits apply across temperature range, unless otherwise noted.

**Note 1:** "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed. Except for "Operating Temperature Range" they are not meant to imply that the devices should be operated at these limits. The table of "Electrical Characteristics" provides conditions for actual device operation.

**Note 2:** Capacitance is guaranteed by periodic testing.

**Note 3:**  $C_{PD}$  determines the no load AC power consumption of any CMOS device. For complete explanation see 54C/74C Family Characteristics application note AN-90.
