## $\mu$ PC1100, $\mu$ PC1150

### DUAL SWITCHING REGULATOR CONTROL CIRCUIT

#### DESCRIPTION

The  $\mu$ PC1100,  $\mu$ PC1150 are PWM type dual switching regulator control circuits which incorporate 2.5 V voltage reference, variable frequency oscillator, two sets of synchronized switching control circuits, timer latch short protection circuit and ON/OFF control circuit on a single monolithic chip. The  $\mu$ PC1100,  $\mu$ PC1150 feature low supply voltage operation, low stand-by current and low supply current therefore, these ICs are the optimum choice for battery operated portable equipments power supply and other DC-DC converter applications. Two ICs are available in accordance with short protection method.

#### FEATURES

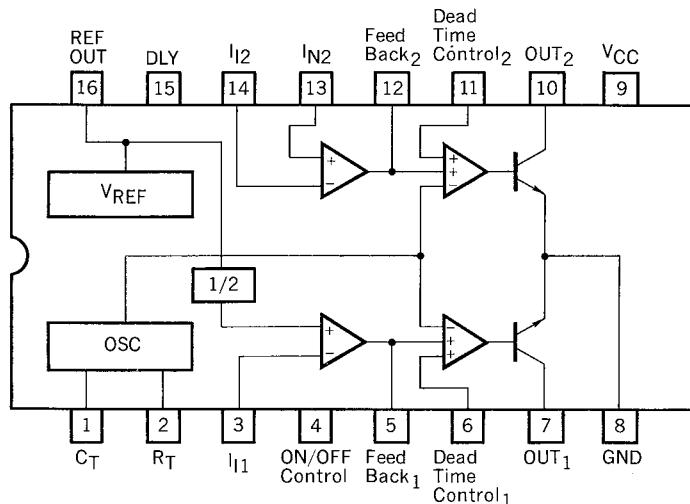

- Two outputs synchronized operation
- Wide supply voltage range  $3.6 \text{ V} \leq V_{CC} \leq 40 \text{ V}$
- Low stand-by and supply current stand-by mode; 2.2 mA, operation mode; 2.5 mA
- Timer latch short protection circuit
- $\mu$ PC1100 – Two outputs cut off when one channel becomes short state.
- $\mu$ PC1150 – Only short channel cuts off.
- Internal ON/OFF control circuit

#### ORDERING INFORMATION

PART NUMBER	PACKAGE	QUALITY GRADE
$\mu$ PC1100C	16 pin Plastic DIP (300 mil)	Standard
$\mu$ PC1100GS	16 pin Plastic SOP (300 mil)

## RECOMMENDED SOLDERING CONDITIONS

The following conditions (see table below) must be set when soldering this product.

Please consult with our sales offices in case other soldering process is used, or in case soldering is done under different conditions.

## TYPES OF SURFACE MOUNT DEVICE

For more details, refer to our document "SEMICONDUCTOR DEVICE MOUNTING TECHNOLOGY MANUAL" (IEI-1207).

$\mu$ PC1100GS,  $\mu$ PC1150GS

Soldering process	Soldering conditions	Symbol
Infrared ray reflow	Peak package's surface temperature: 230 °C or below, Reflow time: 30 seconds or below (210 °C or higher), Number of reflow process: 1, Exposure limit*: None	IR30-00-1
VPS	Peak package's surface temperature: 215 °C or below, Reflow time: 40 seconds or below (200 °C or higher), Number of reflow process: 1, Exposure limit*: None	VP15-00-1

\*: Exposure limit before soldering after dry-pack package is opened.

Storage conditions: 25 °C and relative humidity at 65 % or less.

**Note:** Do not apply more than a single process at once, except for "Partial heating method".

## TYPES OF THROUGH HOLE MOUNT DEVICE
